

WeatherWise AI

PHASE 01 OF 08 | BRAINSTORMING & IDEATION

Project overview

WeatherWise combines current weather data with personalized summaries and recommendations. Its brief describes secure accounts, favorite-location management, Gemini insights, resilient fallback behavior, and a public weather interface alongside protected user features.

Project description

A weather API for live conditions, saved locations, natural-language summaries, and AI-backed activity recommendations.

Project status

Not stated in the source brief. Update this document when the team records an agreed status.

Project capabilities

- Live weather metrics
- Favorite locations
- AI summaries and recommendations
- Fallback behavior and protected routes

Phase description

Define the user problem, explore ideas, and agree which opportunity is worth solving.

Project-specific phase focus

Explore how travelers track several cities and interpret conditions when planning activities.

Phase status and progress

Status: Not stated in the source material.

Progress: Not recorded in the source material.

Tasks and requirements

- ☐ List and group solution ideas
- ☐ Prioritize ideas by feasibility and importance
- ☐ Write the customer problem statement
- ☐ Map what the user says, thinks, does, and feels
