

WeatherWise AI

PHASE 02 OF 08 | REQUIREMENT ANALYSIS

Project overview

WeatherWise combines current weather data with personalized summaries and recommendations. Its brief describes secure accounts, favorite-location management, Gemini insights, resilient fallback behavior, and a public weather interface alongside protected user features.

Project description

A weather API for live conditions, saved locations, natural-language summaries, and AI-backed activity recommendations.

Project status

Not stated in the source brief. Update this document when the team records an agreed status.

Project capabilities

- Live weather metrics
- Favorite locations
- AI summaries and recommendations
- Fallback behavior and protected routes

Phase description

Turn the validated problem into functional, non-functional, data-flow, and technology requirements.

Project-specific phase focus

Define location ownership, live weather data, public access, AI insight, and fallback requirements.

Phase status and progress

Status: Not stated in the source material.

Progress: Not recorded in the source material.

Tasks and requirements

- [] Map the customer journey and touchpoints
- [] Diagram system data flows
- [] Document functional and non-functional requirements
- [] Choose and justify the technology stack

Relevant documents and data

Project brief: _WeatherWise AI document.docx

Phase templates:

- Customer Journey Map (2. Requirement Analysis/Customer Journey Map.pdf)
- Data Flow Diagram (2. Requirement Analysis/Data Flow Diagram.pdf)

- Solution Requirements (2. Requirement Analysis/Solution Requirements.pdf)
- Technology Stack (2. Requirement Analysis/Technology Stack.pdf)

Project technology stack

- Node.js
- Express.js
- MongoDB
- Mongoose
- OpenWeatherMap
- Gemini AI
