

WeatherWise AI

PHASE 03 OF 08 | PROJECT DESIGN PHASE

Project overview

WeatherWise combines current weather data with personalized summaries and recommendations. Its brief describes secure accounts, favorite-location management, Gemini insights, resilient fallback behavior, and a public weather interface alongside protected user features.

Project description

A weather API for live conditions, saved locations, natural-language summaries, and AI-backed activity recommendations.

Project status

Not stated in the source brief. Update this document when the team records an agreed status.

Project capabilities

- Live weather metrics
- Favorite locations
- AI summaries and recommendations
- Fallback behavior and protected routes

Phase description

Check problem-solution fit and describe the proposed solution and its architecture.

Project-specific phase focus

Design the flow from saved city to current conditions and context-aware recommendations.

Phase status and progress

Status: Not stated in the source material.

Progress: Not recorded in the source material.

Tasks and requirements

- ☐ Complete the problem-solution fit canvas
- ☐ Describe the proposed solution and user value
- ☐ Diagram the solution architecture

Relevant documents and data
