

WeatherWise AI

PHASE 05 OF 08 | PROJECT DEVELOPMENT PHASE

Project overview

WeatherWise combines current weather data with personalized summaries and recommendations. Its brief describes secure accounts, favorite-location management, Gemini insights, resilient fallback behavior, and a public weather interface alongside protected user features.

Project description

A weather API for live conditions, saved locations, natural-language summaries, and AI-backed activity recommendations.

Project status

Not stated in the source brief. Update this document when the team records an agreed status.

Project capabilities

- Live weather metrics
- Favorite locations
- AI summaries and recommendations
- Fallback behavior and protected routes

Phase description

Build the solution, keep its code organized, and track which planned features are implemented.

Project-specific phase focus

Implement weather and location services, guarded user flows, AI integration, and fallbacks.

Phase status and progress

Status: Not stated in the source material.

Progress: Not recorded in the source material.

Tasks and requirements

- ☐ Organize code into readable, reusable modules
- ☐ Implement the core solution against requirements
- ☐ Record feature names, modules, and implementation status
- ☐ Review code layout and maintainability

Relevant documents and data

Project brief: _WeatherWise AI document.docx

Phase templates:

- Code Layout, Readability and Reusability (5. Project Development Phase/Code-Layout, Readability and Reusability.pdf)

- Coding & Solution (5. Project Development Phase/Coding & Solution.pdf)
- Functional Features Included (5. Project Development Phase/No. of Functional Features Included in the Solution.pdf)

Project technology stack

- Node.js
- Express.js
- MongoDB
- Mongoose
- OpenWeatherMap
- Gemini AI
