

WeatherWise AI

PHASE 06 OF 08 | PROJECT TESTING

Project overview

WeatherWise combines current weather data with personalized summaries and recommendations. Its brief describes secure accounts, favorite-location management, Gemini insights, resilient fallback behavior, and a public weather interface alongside protected user features.

Project description

A weather API for live conditions, saved locations, natural-language summaries, and AI-backed activity recommendations.

Project status

Not stated in the source brief. Update this document when the team records an agreed status.

Project capabilities

- Live weather metrics
- Favorite locations
- AI summaries and recommendations
- Fallback behavior and protected routes

Phase description

Plan and run tests that show how the solution behaves, including performance under expected load.

Project-specific phase focus

Test location access, provider responses, fallback paths, and weather insight behavior.

Phase status and progress

Status: Not stated in the source material.

Progress: Not recorded in the source material.

Tasks and requirements

- ☐ Choose test tools, modules, and environment
- ☐ Define representative test scenarios
- ☐ Capture performance results and observations
- ☐ Record issues and follow-up actions

Relevant documents and data

Project brief: _WeatherWise AI document.docx

Phase templates:

- Performance Testing (6.Project Testing/Performance Testing.pdf)

Project technology stack

- Node.js
- Express.js
- MongoDB
- Mongoose
- OpenWeatherMap
- Gemini AI
