

# WeatherWise AI

PHASE 07 OF 08 | PROJECT DOCUMENTATION

## Project overview

WeatherWise combines current weather data with personalized summaries and recommendations. Its brief describes secure accounts, favorite-location management, Gemini insights, resilient fallback behavior, and a public weather interface alongside protected user features.

## Project description

A weather API for live conditions, saved locations, natural-language summaries, and AI-backed activity recommendations.

## Project status

Not stated in the source brief. Update this document when the team records an agreed status.

## Project capabilities

- Live weather metrics
- Favorite locations
- AI summaries and recommendations
- Fallback behavior and protected routes

## Phase description

Package the executable project, setup instructions, and documentation needed to review or run it.

## Project-specific phase focus

Document service configuration, weather providers, API routes, and run instructions.

## Phase status and progress

Status: Not stated in the source material.

Progress: Not recorded in the source material.

## Tasks and requirements

- ☐ Organize source and executable files
- ☐ Write setup and run instructions
- ☐ Prepare project documentation
- ☐ Check the submission against the deliverables list

## Relevant documents and data

Project brief: \_WeatherWise AI document.docx

Phase templates:

- Project Executable Files (7.Project Documentation/Project Executable Files.pdf)
- Sample Project Documentation (example) (7.Project Documentation/Sample Project Documentation.pdf)

## **Project technology stack**

- Node.js
- Express.js
- MongoDB
- Mongoose
- OpenWeatherMap
- Gemini AI

## **Phase notes and decisions**
